

FEAUTURES

- Industrial Use
- Stainless steel in contact with the material
- IP65 Protection Class
- Easy handling and assembly
- Heavy duty resistant
- High capacity, 20 t /s filling speed
- Precision weighing, 1/1000 accuracy
- 0 kg-2.000 kg Big-Bag filling
- Pneumatic suspension system
- Automatic bag bottom levelling system with vibro vibration
- Continuous weight information recording and information transfer via control panel
- Performing the filling process precisely in fast-slow filling logic
- Authorisation and user identification, date-time via the panel

Reporting

- Low air consumption
- Local Filter Adaptation for powder products
- Many setting parameter features in the operator panel
